Measurement Using the Digital  
Microscope and Associated Software

Integrated Packaging Solutions  
4010 Youngfield Street  
Wheat Ridge, CO 80033  
USA

## Standard Features

### Digital Microscope

- Continuous magnification at 10~50X, 200X
  - Hands free camera and adjustable boom
- Measurement capability with included software
- Enhanced, adjustable 5" – 6" die holder
  - Radial spin capability for checking grinding process
  - Allows for measurement without recalibration

### Image Processing Computer

- Industrial grade computer
- LCD Viewing Monitor
  - Adjustable monitor arm
- Wireless keyboard and mouse

### Manual magnification lamp

- Large 5" optical-quality glass with diffuser
- Magnification at 2.25X, 90 LED with adjustable arm
- Tool rest for inspection of large, round or odd shaped parts

### Too/VIEW Bench

- 30" x 60" Maple work surface

## Overview

ToolVIEW is a high quality visual inspection platform that combines specialized equipment in an all-in-one system. The ToolVIEW allows inspection of can making tooling by magnified visual inspection or dimensionally checked using the digital magnification feature.

ToolVIEW's digital microscope is capable of taking pictures of inspected tooling that can be processed on the on-board computer, saved and shared with tool room personnel.

## Benefits

- Compact system brings inspection system to one bench
- Easy to operate Windows based computer
- Large monitor for clear view of visual or dimensional inspection
- Heavy duty, enhanced bodymaker Die holder allows for secure rotation of tools for complete inspection
