Standard Features

- Highest quality double seam gauge and software
- Integrated & quiet enclosed seam saw
- Customizable HTML and/or Excel reporting
- Remote access to statistics and data reporting
- Seam inspection system made of all stainless steel

SeamCHECK™ Benefits

- Precise analyzation of double seam operation
- Combines specialized equipment in an all-in-one system

Overview

The SeamCHECK system combines the highest quality automatic double seam analyzer / software, enclosed seam saw and integrated storage all in a high quality stainless steel bench. As well as the automatic seam analyzer, all the equipment to ensure a superior seaming operation can be added to this system. The SeamCHECK was designed to incorporate optional auxiliary equipment based only upon your needs:

Auxiliary Equipment

- Height Gauge
- Countersink Gauge
- Seam Micrometer
- Can Stripper
- CO2 Tester with Temperature Controlled Tank
- Etc.
