VertiSPRAYTM

VertiSPRAY is a continuous **Vertical IC Spray Machine**. This continuous vertical motion applies coating to a vertical can while dealing with overspray and mist collection in a highly controlled manner. Our method of spray and precise mist collection equals a clean environment needing less maintenance and releasing less particulates that could potentially be inhaled by an operator and sent to the exhaust discharge.

Standard Features

- Quick accurate gun adjustment
- Computer controlled coating applications
- Continuous motion vertical spray (zero dwell)
- 1000 cpm machine speed
- Precision overspray capture & mist collection system
- 10 pockets with single stationary gun

VertiSPRAY Benefits

- Gun mounts are precise, repeatable & quickly adjustable
- Exhaust system captures significantly more airborne coating than standard machines
- Overspray capture system decreases use of incinerator & bag house
- Very simple height and diameter change-overs
- Ability to locate machine closer to IBO
- MachineBRITE illumination system for operation & maintenance
