X2 CROSS HATCH

The **X2 Cross Hatch Machine** applies a precisely controlled surface finish to standard carbide Bodymaker punches. The term “**cross hatch**” comes from the x-pattern of the surface finish applied by the X2 machine, which has been proven beneficial in many ways to the can ironing or body making process.

Standard Features

- Fully programmable HMI controls
- Automated Cross Hatching
- Integrated safety features
- Quick connect/disconnect punch mounting system
- Removable stainless steel oil pan/debris tray

X2 Cross Hatch Machine Benefits

- Improved punch life
- Consistent and repeatable punch surface finish
- Optimized bodymaker punch stripping
- Reduced bodymaker tear-offs
- Uses IPS optimized diamond impregnated media
