

CanSCHOOL™

Complete Training System

02 Equipment Specific Training

Our equipment training combines classroom learning with hands-on instruction. In turn, your employees will have a solid understanding of the skills required to execute maintenance day to operational support and rebuilds.

01 Office Training Seminar

Our trainer will walk your office personnel through the line to familiarize them with the manufacturing process and the significance of open communication.

03 Tool Room Training

Highlights include:

- Recommended Operating Procedures
- Inventory Control
- Rework Procedures
- Inspection/Tolerancing
- Recommended Tool Room Equipment
- Tooling Drawing Control

CanSCHOOL, Training Support

IPS offers **CanSCHOOL** training for your staff on a variety of levels. We use experienced Can Makers with real world experience from the plant level, with combined operational and maintenance backgrounds.

■ CanSCHOOL 101- Office Training Seminar:

This program offers training for your office personnel in the understanding of your company's basic operational procedures to include but not limited to familiarizing them with the manufacturing process and significance of open communication.

■ Equipment Specific Training:

Our Equipment Training combines classroom learning with hands on instruction. Your employees will understand the skills required to execute *maintenance, day to day operational support and rebuilds*:

- | | | | |
|--------------|-----------|-------------|------------------|
| • Palletizer | • Cupper | • Bodymaker | • Ovens |
| • Decorators | • Trimmer | • Washer | • Necker/Flanger |
