## **Oven and Washer Spoilage Reduction System**

The TightPACK system allows an existing washer and / or oven to maintain a tight and side supported can pack reducing spoilage by eliminating tipped cans. This system upgrade can be added to your existing equipment. Flexible infeed, discharge and side guide components allow for external adjustments for quick size changes and precise pack widths. IPS uses an efficiently innovative system of mechanical structures to create the tight pack needed for spoilage reduction.

### **Benefits of the *Tight*PACK System:**

- Works with almost any make, model and type of washer and / or oven
- Maximum external adjustability for precise pack width
- Drastically reduced washer and / or oven spoilage
- Upgrade to your existing equipment
- Quick return on investment
