Tool tracking & inventory software for Bodymaker & Necker Tooling.

A tool tracking & inventory control system, designed specifically for the can making industry, featuring five different software modules.

Operator convenience is top of mind, with streamlined interfaces & capability for data matrix code scanning. ToolCONTROL™ is the most powerful & easy-to-use inventory software system in the can industry today.

Production Line	Tool	Size	Material	Location	Tool Status	Tool Count
Production Line 1 Can Size 211 12oz Punch	10	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	11	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	12	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	13	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	14	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	15	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	16	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	17	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	18	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
	19	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch

WORKSTATION

30"x 48" industrial benchtop with computer, mounted monitor, keyboard & mouse, and RFID employee badge scanner.

DATA MATRIX CODE SCANNER

Hand-held scanner for use with tools etched with the serial number as a data matrix code. Allows for effortless entry of tool serial number.

REPORTING ENGINE

Report generation that allows admins to run reports on bodymaker history, tool change history, reason for tool change, user activity, tool inventory, and more.

Tool ID	Tool Name	Tool Size	Tool Material	Tool Location	Tool Status	Tool Count
100001	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
100002	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
100003	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
100004	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch
100005	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch	2.0000 inch

BODYMAKER INVENTORY MODULE

Records complete history of every tool through location, measurement data, & events. Allows operators to quickly log tooling changes & events, & view tooling distribution by progression chart. Notifies operator of deviation from progression chart.

Additional Options

Production
Module

PRODUCTION MODULE

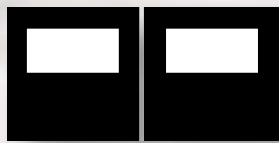

Enables communication between ToolCONTROL™ and the plant SCADA system, providing more insights via the ToolCONTROL™ reporting engine (such as cans produced per tool).

Can Weight
Module

CAN WEIGHT MODULE

Enables plant personnel to log can weight and wall thickness data, providing more insights via the ToolCONTROL™ reporting engine.

Necker Inventory
Module

NECKER INVENTORY MODULE

Records the complete history of every tool through location, measurement data, and events. Allows operators to quickly log tooling changes and events. Notifies operator of deviation from match gap.

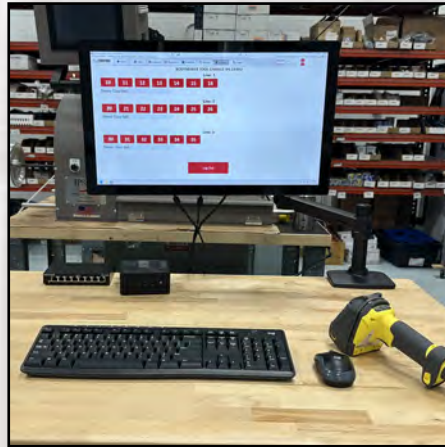

Enterprise Reporting
Module

ENTERPRISE REPORTING MODULE

Enables the compilation of data from ToolCONTROL™ installations at multiple facilities into one dashboard, allowing for enterprise-level data insights.

Additional Options

ADDITIONAL WORKSTATION

Additional workstations provide operators with more ways to access ToolCONTROL™ (such as from the production floor).

ToolSCAN 2.0™ INTEGRATION

When paired with the IPS ToolSCAN 2.0™ precision measurement gauge, measurement data can be digitally transferred and stored within ToolCONTROL™.

X2 PRO™ INTEGRATION

When paired with the IPS X2 PRO™ crosshatch machine, crosshatch data can be digitally transferred and stored within ToolCONTROL™.

Why ToolCONTROL™

THE CHALLENGE

Many operations rely on manually maintained spreadsheets to track tooling inventory, resulting in significant time consumption & increased risk of human error. Other inventory software is often generic & not specifically designed for the can making environment. Additionally, failure to compile tool data, operator data, & production data together leads to missed insights that otherwise would drive improvements.

THE IPS SOLUTION

ToolCONTROL™ was developed in direct partnership with can makers to ensure the system reflects the practical demands in today's can plants. The operator interface features an RFID badge login, touchscreen, and simplified navigation so tool changes are completed with a few taps on the screen. Data entry is designed to be automatic, with data matrix code scanning and IPS equipment integration, minimizing the potential for human error.

OPERATIONAL GAINS

ToolCONTROL™ offers increased visibility and data-driven decision-making. Progression charts showing tool quantities by measurement size allow plants to quickly identify gaps and plan tool orders or grinding schedules more effectively, reducing the time spent manually managing an alternative solution. Reports, such as cans produced by tool, distribution of tool change reasons, and operator tool change activity, provide actionable insight.

Specifications

ToolCONTROL™ Dimensions (with bench)

Production Weight	190 lbs / 86.2 kgs
Height	48 in / 122 cm
Length	31 in / 79 cm
Depth	48 in / 122 cm

ToolCONTROL™ Computer Specifications

CPU	Intel Ultra 7
Memory	16GB RAM
Storage	256GB SSD
Operation System	Windows 11 Pro

Upon purchase, the customer is required to setup a SQL server to host the software.

Required SQL Server Specifications

CPU	i7 CPU or equivalent
Memory	32GB RAM
Storage	256GB SSD
Operation System	Windows-based OS
SQL Application	SQL Server 2022+
